## **DETAILED ACTION**

### ***Drawings***

Figures 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

## **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

### **In claim 1,**

----line 3, "lamp" has been changed to --lamps--;

----line 11, "to" before "brightness" has been deleted;

### **In claim 5,**

----line 4, "bride" has been changed to --bridge--;

**In claim 15,**

----lines 2-3, "first half bridge circuit" has been changed to --plurality of half bridge circuits--;

----line 14, "lamps" has been changed to --lamp--.

***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a method for dimmable control of an output EL lamp driver having the steps of : minimizing the output impedance of the half bridge circuit coupled to the single common terminal to prevent brightness crosstalk between EL lamps; selecting output impedances of remaining half bridge circuits to produce rounded waveforms across terminals of the EL lamps; manipulating a drive waveform of one of the plurality of EL lamps to control brightness (claim 1); or minimizing the output impedance of the first half bridge circuit coupled to the first terminal to prevent brightness crosstalk; selecting output impedance of second half bridge circuit to produce rounded waveforms across terminals of the EL lamp; manipulating a drive waveform of the EL lamp to control brightness (claim 15). The remaining claims 2-14 are allowed by virtue of their dependencies on the independent claims. Hence, the examiner has allowed claims 1 through 23.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Koskovich et al., Patent No. 5,861,719; Littlefield et al., Patent No. 6,011,382; Alessio, Patent No. 5,336,978; Kamens et al., Patent No. 5,418,434.

None of the above patents discloses the dimmable control method as recited.
